IN THE CLAIMS

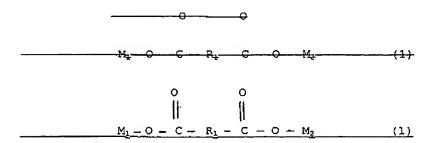

Please amend the claims of the present application under the provisions of 37 C.F.R.  $^{1}$ 1.121(c), as indicated below:

- 1 (currently amended): A nitrate nitrite free grease composition for avoiding an abnormal pecling of a rolling surface of a bearing comprising:
  - a basc oil,
  - a thickener, and
  - an additive,

wherein the base oil contains 20% by weight or more of alkyldiphenyl ether oil in the base oil, and has a kinetic viscosity of 20 to 150 mm2/s at 40 degree °C, and wherein the thickener is an aromatic diurea compound represented by the following formula (2)

$$\begin{array}{c|cccc}
O & O \\
\parallel & \parallel \\
R_2 - NHCNH - R_3 - NHCNH - R_4
\end{array}$$
(2)

Where [[R2]]  $\underline{R}_2$  and [[R4]]  $\underline{R}_4$  are the same or different, and represent each an aromatic hydrocarbon group having 6 to 15 carbon atoms, and [[R3]]  $\underline{R}_3$  represents an aromatic hydrocarbon group having 6 to 15 carbon atoms, and is contained in an amount of 5 to 30% by weight based on the total amount of the base oil and the thickener, and wherein the additive contains as an essential component 0.05 to 10 parts by weight of a metal salt of a dibasic acid based on 100 parts by weight of the base oil and the thickener, the metal salt of the dibasic acid being represented by the following formula:

07/16/2006 15:51 2123918010 HEDMAN & COSTIGAN, PC PAGE 06

where  $M_1$  and  $M_2$  represent the same or different alkali metal, and  $R_1$  represents aliphatic hydrocarbon group or an aromatic hydrocarbon group <u>said grease</u> containing no nitrite.

## 2 (canceled)

3 (previously presented): The grease composition as claimed in claim 1, wherein the base oil contains synthesized hydrocarbon oil.

## 4-6 (canceled)

- 7 (currently amended): The grease composition as claimed in claim 1, wherein each of the  $R_2$  and  $R_4$  is  $C_6H_4(CH_3)$ , and the  $R_3$  is  $C_6H_4CH_2C_4H_4$
- 8 (currently amended): The grease composition as claimed in claim 1, wherein the  $M_1$  and  $M_2$  are each lithium, sodium, or potassium.
- 9 (currently amended): The grease composition as claimed in claim 1, wherein the metal salt of the dibasic acid is one of a metal salt of azelaic acid, sebacic acid and adipic acid.
- 10 (currently amended): The grease composition as claimed in claim 9, wherein the metal salt of the dibasic acid is sodium sebacate.
- 11 (currently amended): The grease composition as claimed in claim 1, wherein the additive comprises 0.05 to 5 parts by weight of an antioxidant in addition to the metal salt of the dibasic acid based on 100 parts by weight of the base oil and the thickener.
- 12 (currently amended): The grease composition as claimed in claim 11, wherein the antioxidant is selected from the group consisting of a sulfur-containing antioxidant, a phenol-based antioxidant and an amine-based antioxidant.
- 13 (original) A grease composition sealed bearing, in which a sliding part of the bearing is sealed with the grease as claimed in claim 1.
